

Storytelling in motion

## Learn with video!

Topics from sciences to the arts and everything in between, Binumi has you covered for all of your educational needs

Binumi enables teachers to create and assign exciting and dynamic courseware and projects.

Students can make video projects on multiple subjects, work collaboratively with other students and complete assignments through group work.

With Binumi, educators and students can create stunning video projects at home or in the classroom in minutes.

**Over a million royalty free multimedia clips**  
20,000 new clips added every month

## Make school video projects

We give educators all of the tools they need to bring the power of video into their classroom

Binumi.com is the largest educational video creation platform in the world and makes it possible for educators and students of all ages to create high quality video projects in minutes.

It combines a vast royalty free multimedia library featuring over one million clips from around the globe with an easy-to-use online editor and cloud-based storage, all accessed through a web browser.

Our topics make it easy for educators and students to find the perfect clips.

Multimedia is grouped into thousands of educational topics specifically organised according to an internationally standardised curriculum map.

**Binumi is a one-stop shop for video creation**

**The possibilities are endless**

# How it works

Over a million stunning multimedia clips covering a wide range of educational topics combined with an easy-to-use online drag and drop editor

Kickstart your project by selecting up to five topics to be the framework of your video and continue to the editor.

Choose your clips, upload your own content, add text, voiceovers, and music, and then edit your project shot-by-shot. It's that easy!

Click 'Finish' and Binumi does the rest. Download and share your video with the world.
