Recommendations

- Music Interventions
 - 1.1 The perioperative team may implement music interventions across the perioperative continuum of care. (Conditional Recommendation)

High-quality evidence strongly supports the use of music to relieve anxiety during surgical and other invasive procedures. (Conditional Recommendation)

Sixteen studies, 10-16, 18, 19, 21, 24-26, 34, 35 three systematic reviews, 8, 23, 36 an integrative review, and five literature reviews, 7, 27-29, 31, 33 evaluated the ability of music interventions to reduce patient anxiety, pain, and stress before, during, and after operative and other invasive procedures. Thirteen studies found that music was an effective intervention to reduce anxiety levels in the surgical and invasive procedure areas. Three studies found
