The Unpaywall Data Feed

The gold standard for discovering Open Access academic research.

Tracks the status of over 135 million articles, about 35 million of which are Open Access – growing daily

The Data Feed draws from over 5,000 repositories, and has records for 88,000 journals from 14,000 publishers.

For any given DOI, all the available OA copies (if there are any) are provided as well as supplying relevant metadata and license information.

The Data Feed product provides daily changefile updates of the index, so that the licensee can run a synced copy on their own servers.

The Unpaywall Data Feed

The Unpaywall Data Feed is available in 3 main ways – two are free. They include:

1. **Data Feed** Snapshot - comes out twice per year – available on the website

2. REST API - provides up to 100,000 API calls per day – find instructions on the website

3. **Paid Subscription** to the Data Feed

- Provides real-time updates with daily changefiles available
- Pricing is based on your intended use, your size
- We can provide special pricing as well if you wish to use the REST API but go over the free threshold of 100,000 API calls per day

You're already using Unpaywall if you use:

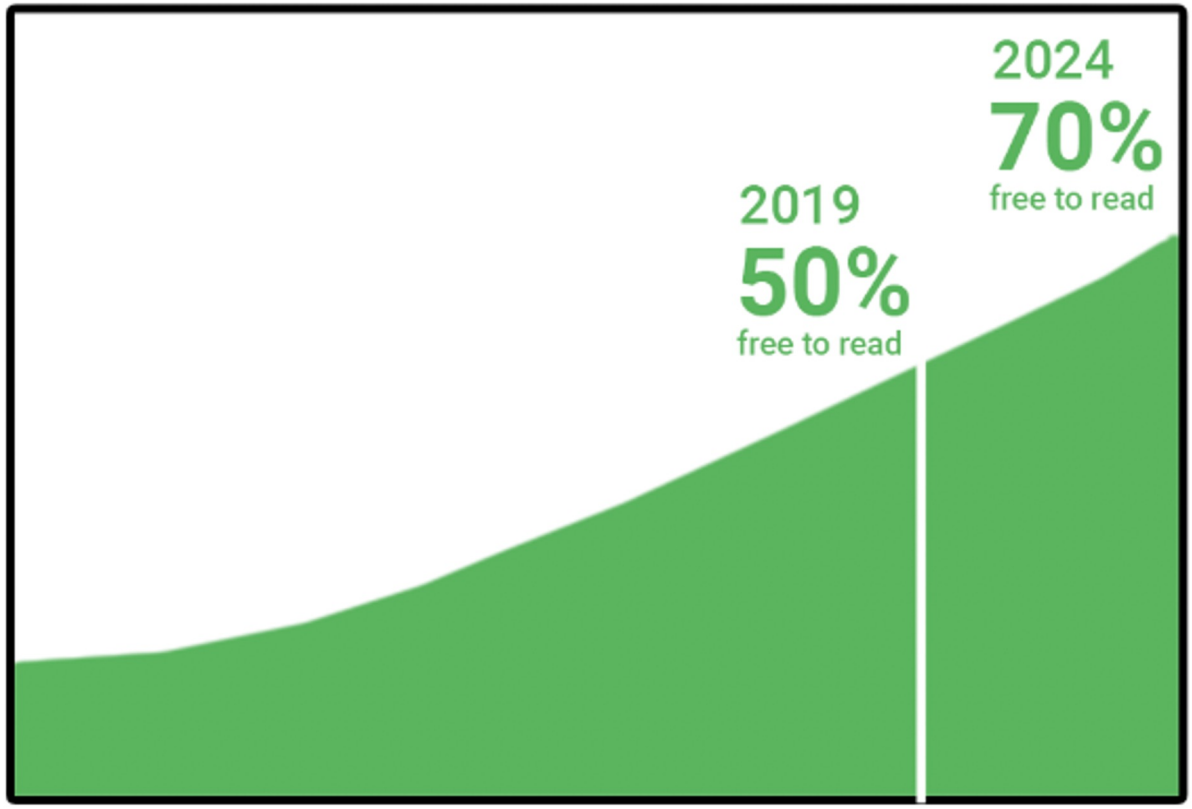
- Web of Science
- Scopus
- ProQuest Summon
- OCLC WorldCat
- EBSCO EDS
- DS Dimensions
- Lens
- etc..

50%

of article views could be fulfilled by OA right now...

70%

will be in five years.



50%

of article views must be purchased now.

30%

must be purchased in five years.
