# Delivery Formats

**PLATINUM** — Platinum Forecast Systems is an online database that provides instant delivery of detailed data comprising 15 years of forecast data and 10 years of historical data. clients can custom-tailor their queries by data field, including Date Range, Platform Category, System Data Type, Category of Use, Worldwide Geography, Company and Currencies, among others. Globalaccess is via email address and password, licensed to one authorized user. Multi-site, multi-user licensing is available. Platinum is sold on the basis of a licensed operations period.

**ONLINE** — A traditional electronic system with 10-year forecast data in which updated information is available online from the time it is posted to our Intelligence Center. Individual reports, Market Segment Analyses, and appendices are updated at least twice yearly, while Interim Updates provide breaking news on new developments. Access is via an assigned user name and password, licensed to one identified user, with options for multiple users.

**BINDER** — Provided initially as a complete binder; monthly supplements of reports in hard-copy format are shipped via courier services during the annual subscription period. This service lacks the timeliness of our other formats, but provides the advantage of a printed account for ready reference. Note that shipping and handling costs apply.

**FTP** — Upload to your site available. Inquire for price.

**CORPORATE & WORLDWIDE ENTERPRISE LICENSES** — Forecast International Inc. offers Online data delivery solutions for every possible requirement. Licensing of any combination of our Intelligence Services, ranging from single, identified user(s) via user name and password to unlimited worldwide corporate utilization via an exclusive Web portal, is available. Contact us at 203.426.0800, 800.451.4975 (U.S. & Canada) or sales@forecast1.com for a confidential discussion of your intelligence requirements.

## Products and Services

PLATINUM ONLINE BINDER

### Airborne Retrofit & Modernization Forecast

Authored by **Thomas Dolzall**, this service contains 60 reports providing in-depth coverage of R&M markets for Fighter/Attack/Trainer Aircraft, Commercial & Military Transports, Light Aircraft, Military Rotorcraft, and Engines. Reports cover out-of-production aircraft as well as models currently in operation. Also included are three Market Segment Analyses providing unit and value market projections. Nine appendices, including a comprehensive listing of modernization programs by platform, complete the package.

**PS501 R501 501**

### Civil Aircraft Forecast

Authored by **Raymond Jaworowski** and **Douglas Royce**, Civil Aircraft Forecast includes 65+ detailed reports covering all facets of the fixed-wing commercial and private aviation industries. Four Market Segment Analyses provide in-depth examination of the markets for Large Commercial Jet Transports, Regional Aircraft, Business Jets, and General Aviation/Utility Aircraft. Also features seven appendices, including updated consolidated production statistics and a historical production table.

**PS018 R018 018**

### Military Aircraft Forecast

Authored by **Raymond Jaworowski** and **Douglas Royce**, Military Aircraft Forecast provides full coverage of fixed-wing military aircraft of all types in 43 individual reports. Four Market Segment Analyses offer complete overviews of the Fighter, Military Transport, Military Fixed-Wing Trainer, and Special Mission Aircraft markets, including trend analysis, program milestones, and computations of projected market shares of all competitors. Also features 10 appendices, including consolidated production statistics, a 10-year historical production table, inventories, and a listing of aircraft by powerplant.

**PS015 R015 015**

### Rotorcraft Forecast

Authored by **Raymond Jaworowski** and **Douglas Royce**, Rotorcraft Forecast includes nearly 60 reports covering the turbine-powered and piston-powered rotorcraft markets. Worldwide coverage includes detailed reports on Russian and Chinese rotorcraft. Five Market Segment Analyses explore the dynamics of the markets for Light Military Rotorcraft, Medium/Heavy Military Rotorcraft, Light Commercial Rotorcraft, Medium/Heavy Commercial Rotorcraft, and Aviation Turboshaft Engines. Also contains six appendices, including listings of military and civil rotorcraft inventories, consolidated production statistics, and a 10-year historical production table.

## Products and Services

PLATINUM ONLINE BINDER

### Airborne Electronics Forecast

Authored by **C. Zachary Hofer**, Airborne Electronics Forecast covers the full range of systems employed on various platforms, or currently in development. All 130+ reports contain production forecasts with a supporting Forecast Rationale. New reports are also added frequently on emerging programs. Also features three Market Segment Analyses covering Airborne Radar Systems, U.S. Military Airborne Communications Systems, and Airborne Electro-Optical Systems. Contains six supporting appendices, including consolidated production statistics and a list of identified avionics applications by aircraft.

PS105 R105 105

### An Equipment Forecast

Authored by **Andrew Dardine**, AN Equipment Forecast covers a full array of electronics equipment employed by the U.S. armed forces on land, at sea, and in the air. Each of the product's 109 reports features contract award and funding information, a Forecast Rationale, and a market forecast. New reports are also added frequently on emerging programs. Also included are five appendices, including consolidated production statistics.

PS019 R019 019

### C5I - Command, Control, Communications, Computers, Cyber & Intelligence Forecast

Authored by **Andrew Dardine**, C5I - Command, Control, Communications, Computers, Cyber, and Intelligence Forecast includes 95+ reports that provide a comprehensive overview of the C5I systems that equip today's armed forces, plus those systems currently in development. Includes two Market Segment Analyses covering the markets for C5I and for Multimission Communications Systems. New reports are also added frequently on emerging programs. Five appendices, including consolidated production statistics, complete the package

PS023 R023 023

### Electronic Systems Forecast

Authored by **Andrew Dardine**, Electronic Systems Forecast includes coverage of 65+ leading aerospace and defense electronics programs and systems. The latest developments in avionics, C4I, electronic warfare, and other select market sectors are examined. Reports provide funding or production forecasts. New reports are also added frequently on emerging programs. Includes an analysis of the U.S. Defense Electronics Market. Five appendices, including consolidated production statistics.

PS017 R017 017

### Electronic Warfare Forecast

Authored by **Andrew Dardine**, Electronic Warfare Forecast provides coverage of the self-protection jamming and electronic support measures systems in development or production for military platforms, both in the skies and on the surface. Included are 80+ reports on key U.S. and international EW programs and systems. New reports are also added frequently on emerging programs." Three Market Segment Analyses and five appendices, including consolidated production statistics.

PS022 R022 022

### Electro-Optical Systems Forecast

Authored by **Andrew Dardine**, Electro-Optical Systems Forecast keeps pace with advancing technologies. This service includes some 73 market intelligence reports covering key U.S. and international EO technologies and R&D programs. New reports are also added frequently on emerging programs. Additionally, two Market Segment Analyses, covering Airborne EO and Land & Sea-Based EO Systems, are featured. Also contains five supporting appendices, including consolidated production statistics.

PS021 R021 021

### Land & Sea-Based Electronics Forecast

Authored by **Andrew Dardine**, Land & Sea-Based Electronics Forecast features 150+ reports that examine the key land & sea-based electronics systems and technology development programs that comprise this highly profitable market. New reports are also added frequently on emerging programs. Also includes three Market Segment Analyses and four appendices, including consolidated production statistics.

PS106 R106 C106

### Radar Forecast

Authored by **Andrew Dardine**, Radar Forecast covers the full range of systems that will equip the platforms of tomorrow. Each of this product's more than 95+ reports contains a production forecast and supporting Forecast Rationale. Includes market outlooks for U.S. and international radar systems, including airborne fire control and airborne early warning and control (AEW&C) systems as well as sea-based and land-based systems. New reports are also added frequently on emerging programs. Comes complete with three Market Segment Analyses and four supporting appendices, including consolidated production statistics.

## Industrial & Marine Gas Turbine Installations Database

Intuitive online database lists some 14,070 plants worldwide, totaling over 36,372 machines installed as far back as 1950. Planned installations through 2032 total over 1,090. Covers both heavy-duty and aeroderivative GTs used in industrial applications, as well as for marine propulsion. An invaluable tool for aftermarket players, MRO companies, parts makers, and OEMs. A must-have product for those who need to know **Where the Equipment Is, Who Owns It, and Who Operates It.**

Searches can be implemented to custom tailor your report by power range - in kW or HP - and by the specific years of installation, enabling you to capture only the information required. Save and download information in Excel for easy data manipulation.

## Companies, Contractors, Military Force Structures & Budgets

Products and Services		ONLINE	BINDER
<b>Defense &amp; Aerospace Companies</b>			
<p>Authored by <b>Richard Pettibone</b>, Forecast International's two-volume Defense &amp; Aerospace Companies series offers reliable information coupled with unique editorial insight on the world's major aerospace and defense firms. Volume I contains 38 reports covering over 100 U.S. and Canadian primes and their subsidiaries. Volume II includes 53 reports covering 90 companies and subsidiaries with a focus on key players in Europe and Asia.</p>	<b>VOL I</b>	<b>R014</b>	<b>014</b>
	<b>VOL II</b>	<b>R007</b>	<b>007</b>
<b>International Contractors</b>			
<p>The International Contractors product contains detailed information on thousands of aerospace, power systems, and defense contractors. The listing is within Excel spreadsheets, and is delineated into categories such as Program, Contractor, Manufacturer Type, Major Designation, Component, Contractor Address, and Contractor Website. Data is further broken out by major market segments such as Aviation, Electronics, Naval, Power, Space, and Weapons. This service provides quick and to-the-point references for determining who makes what in the worldwide aerospace and defense industry.</p>		<b>R206</b>	—
<b>International Defense Budgets</b>			
<p>Authored by Forecast International's team of International Military Markets Analysts, this service provides the budget outlook for each of the featured countries along with five-year forecasts, and is complemented by the keen insight of Forecast International's International Military Markets Analysts. This service consolidates this information to form a cohesive and concise online reference tool that provides rapid access to authentic national budget documentation (in keyword-searchable format) for 121 countries.</p>		<b>R200</b>	—
<b>U.S. Defense Budget Forecast Database</b>			
<p>Managed by <b>Shaun McDougall</b>, the U.S. Defense Budget Forecast is a streamlined database providing fast and easy access to the Pentagon's entire acquisition budget. The product features useful sorting and data visualization tools, and it presents historical funding alongside the Pentagon's FYDP through an online interface with downloadable Excel spreadsheets. This is the go-to service for anyone familiar with the grind of wading through the massive DoD budget.</p>		<b>DR201</b>	—
<b>Military Force Structures of the World</b>			
<p>If the status of militaries around the globe is your focus, Military Force Structures of the World is your product. Authored by Forecast International's team of International Military Markets Analysts, this service provides in-depth descriptions of 121 national force structures spread across six major regions. Includes detailed manpower summaries for sea, land, and air forces, as well as military equipment inventories.</p>		<b>R034</b>	<b>034</b>
<b>Group Library Option</b>		<b>6 Services</b>	
		<b>ZR-G</b>	

## Market Intelligence Services International Military Markets

The IMM report for each country comprises three segments: **Data, Market Overview,** and **Force Structures.** The Data segment provides full coverage of a nation’s national and military budgets and discusses the geopolitical factors that will impact the country’s military market. A key feature is a five-year defense spending forecast. The Market Overview reviews a country’s military programs – from aircraft to warships – and provides details on plans for future procurement. Force Structures provides a detailed listing of all military manpower and hardware in the nation’s inventory, including missiles, UAVs, military vehicles, aircraft, warships, and more.

Products and Services	ONLINE	BINDER
<p><b>Asia, Australia &amp; Pacific Rim</b></p> <p>The Asia-Pacific Rim region represents the center of a shifting global power dynamic. Burgeoning economies, large populations with more capital to spend, and conflicting ambitions between regional power brokers make the Asia-Pacific a compelling market. Authored by <b>Daniel Darling</b>, this service takes into account the myriad factors behind the conflicts, partnerships and loose alliances forming in the region, providing a broad market perspective.</p>	R036	036
<p><b>Eurasia</b></p> <p>With a geographic purview that includes the states of the former Soviet Union as well as Afghanistan and Pakistan, Eurasia represents a multifaceted security environment characterized by energy politics and conflict flashpoints. Eurasia serves as a convergence point for Russia’s assertive foreign policy, growing Chinese influence, latent Islamic fundamentalism, and U.S. and European efforts to ensure access to burgeoning energy markets. Authored by <b>Derek Bisaccio</b>, International Military Markets - Eurasia offers analytical insight into the complex geopolitical and economic realities of these emerging markets.</p>	R033	033
<p><b>Europe</b></p> <p>With Europe today dominated by two multinational pillars – the European Union and the NATO Alliance – the continent moves closer to achieving cohesion. But despite its peaceful integration, Europe now faces distinct military shortcomings at a time of great stresses along its outer borders. Authored by <b>Daniel Darling</b>, our IMM-Europe product provides insight into the economies, budget situations, and military compositions and needs of each European country.</p>	R037	C037
<p><b>Latin America &amp; Caribbean</b></p> <p>Arms sales to Latin America have traditionally been strongly affected by local economic conditions. Continued economic growth means prospects for the defense market are improving. The countries that present the best sales prospects at present are Argentina, Colombia, Brazil, and Mexico. Authored by <b>Thomas Dolzall</b>, the International Military Markets - Latin America &amp; Caribbean service provides the insight required to gain a competitive advantage in this complex market.</p>	R039	039
<p><b>Middle East &amp; Africa</b></p> <p>The Middle East and Africa are two of the world’s most crucial areas in terms of conflicts, regional security, and important natural resources. As these regions’ security challenges intensify, so, too, does the desire for sovereign defense capabilities. Authored by <b>Nicholas Rakoncza</b> IMM - Middle East &amp; Africa takes you inside the myriad developments in these two regions to offer a clear perspective on the geopolitical factors that will shape their futures.</p>	R038	038
<p><b>North America</b></p> <p>The U.S. represents the largest defense market in the world, and the Pentagon is continually adjusting resources in response to dynamic threat environments. Authored by <b>Shaun McDougall</b>, the International Military Markets - North America service provides critical analysis of political, economic, and budgetary uncertainties that could impact military acquisition programs in the U.S., Canada, and Mexico, as well as several nations in Central America and the Caribbean. Includes detailed overviews of defense spending trends, ongoing military programs, future requirements, and the force structures of each country.</p>	R035	C035

## Market Segment Packages

Our **COMPLETE MARKET SEGMENT PACKAGES** provide you with a convenient and cost-effective executive briefing for formal presentations. Produced annually when our analysts bring together all of the reports and forecasts for each specific Market Segment. To ensure you have the data quickly, you will initially receive the Market Analysis and related program reports with forecasts and rationales in PDF format along with detailed Excel spreadsheets and graphs electronically via email. As an added benefit, you will receive via FedEx, a printed copy of the Complete Data Package in a neatly presented zipper case binder that is ideally suited for executive presentations. You also receive a one-year subscription to our twice-weekly EMarket Alert of breaking industry news and recent developments pertaining to your market of interest. Indispensable for evaluating market potential.

# Value-Added Features

## QUERY SERVICES

Clients to any of our subscription services are entitled to a free Query Service, which is a value-added feature. As a subscriber you can contact any of our analysts via email or phone in order to get routine clarification or interpretation of some of the published material. Note that queries are necessarily limited to questions that can be answered within a very short period of time. Our analysts will do their best to respond to your queries in an expedited fashion.

## WHITE PAPERS

Our team of industry experts release new white papers each month, covering relevant industry analysis and detailed insights on topics that shape both the defense and commercial markets.

## FLIGHT PLAN

For over 50 years Forecast International is the ultimate source of breaking news in the civil aviation industry. Week after week, its analysts employ their knowledge and broad experience to present reliable insights on the latest market developments for industry decision-makers across the globe.

## EMARKET ALERTS

Clients receive an EMarket Alert specific to each individual service to which they subscribe, delivered twice-weekly directly to the desks of the users. Alerts provide the latest breaking news from around the world, combined with insightful perspective and interpretation by our Analysts. What's more, upon the release of each new Market Segment Analysis, our staff posts a summary of its key findings.

## DEFENSE & SECURITY MONITOR

Forecast International's Defense & Security Monitor blog covers market changes and news in a timely manner while lending the unique editorial insight of our Analysts. FI's blog is the ultimate source of industry news with a depth of perspective you won't find anywhere else.

## IN OUR SIGHTS NEWSLETTER

With over 85 years of combined experience, Forecast International and Military Periscope are teaming up to bring you breaking defense news every week. Their analysts employ their knowledge and broad experience to compile, evaluate, and present reliable insights for industry decision-makers throughout the world.

## The Forecast Consulting Group Proprietary and Confidential Research

When selecting a consulting firm, place your confidence in a proven entity. Throughout our 50-year history, the key to our success has been the ability to leverage the power of our comprehensive databases and information systems. Our expert analysts process and insightfully interpret the data in order to provide precise and rational solutions. Forecast International's resources and extensive base of experience can be readily adapted and efficiently focused to fulfill a broad spectrum of civil and military consulting requirements.
