Your university's access to Vetlexicon

Vetlexicon is a reliable tool designed for veterinary professionals that will support you through your career. Whether you need a reference point for a specific diagnosis to help boost your confidence, or a sequence of images that refresh your knowledge with a surgical procedure, you will be able to find it on Vetlexicon.

Why should it be used?

As the world's largest online clinical reference source Vetlexicon delivers instant and structured point of care information in a selection of languages, for the treatment of dogs, cats, rabbits, exotics, horses and cattle, wherever and whenever you need it.

Benefits

-  **Access anywhere at any time**
Vetlexicon is available 24/7 on any internet-enabled device, delivering instant point-of-care support.
-  **Rely on expert written content**
Speed up critical decision-making with trusted specialist content, allowing more time to adapt to the growing demand for veterinary care.
-  **Enable an evidence-based approach**
Qualify your research with further reading, and additional links to other scientific sources such as VetMed Resource and PubMed.
-  **No access limitations**
Vetlexicon allows an unlimited number of concurrent users. Maximize user convenience: IP Addresses of all faculty premises, or Single Sign On (SSO).
